## Woodscan for Milestone 312 Makes barcodes speak.

**Woodscan is the powerful barcode reader for Milestone 312. Just connect it via USB with Milestone 312 and it recognizes products by their barcodes and gives out appropriate product information.**

The powerful laser scanner enables very fast detection of the products, even those with small barcodes. With its wide reading range, Woodscan is the ideal help for blind and visually impaired users to identify products.

Product name and further product information is given out over the powerful speaker of Milestone 312 or through headphones. The spoken product information comes from large, country-specific databases.

In addition to information from the database, you can add your own information for a product by recording a voice message. Therewith you can individualize and enlarge the content of the database. For example, you can add to your favorite chocolate the ingredients, expiry date or amount of calories.

- Powerful laser scanner, with wide reading range
- Information output via strong speaker or headphone
- Frequently updated databases
- Possibility to add information with voice records
- Small in size and weight
- Simple handling, just plug and play
- With Milestone 312 you have more than just a barcode reader: Music and text player, voice recorder, book reader, radio, alarm clock, calendar, RFID reader and much more.
